

Corona virus? Solidarity!

Dear neighbours,
dear house community,

in the face of the current corona pandemic, it is up to all of us to live in solidarity and master the situation together. If you belong to the risk group, we neighbours will be happy to take care of shopping, errands and other urgent errands for you, so that you do not have to leave your own four walls and expose yourself to the risk of infection.

The risk group includes

- People from the age of pension
- People with previous illnesses
(lung diseases, diabetes, cardiovascular diseases, etc.)
- People with weak immune systems

One or more of these points apply to you? Then be especially careful and leave your house as rarely as possible! Besides washing your hands, this is the most effective way to minimize the risk of infection.

If you need assistance, the neighbours listed below will be happy to help you. If you do not belong to the risk group and would like to help our neighbours as well, please register in the list below.

Are you experiencing symptoms such as fever, dry cough and/or shortness of breath?
Never go to your family doctor on your own, but dial the number of the medical emergency service "116117", which will initiate the next steps.

Do you need help?

You can call me! I will go shopping for you, with your dog out or do other urgent things:

Name	Telefonnummer	Stock/Tür
